IN RE:        DRAPER CITY/HAMLET HOMES        ADVISORY OPINION  
              STONELEIGH SUBDIVISION  
              PHASE 3A

Pursuant to written request of the Office of the Utah Private Property Ombudsman our office has been requested to issue an advisory opinion regarding the approval process and final plat approval for Phase 3A, Stoneleigh Subdivision.

STATEMENT OF FACTS

This office has met with attorneys representing the Applicant, Hamlet Homes and Draper. Each party has provided the office written documents upon which I have relied. The chronology of occurrences and events contained in the documents provided by Hamlet Homes is the most complete prepared record. It is used to recreate the listing on the application.

December 2003	Geologic Hazards Ordinance adopted by Draper City.
January 28, 2004	Geology and Geologic Hazards report completed by James Mccalpin of GEO-HAZ Consulting, Inc.
April 15, 2004	Planning Commission forwards positive recommendation to City Council for the preliminary plat of all phases of Stoneleigh Heights.
April 19, 2004	Review of Geology and Geologic Hazards report completed by Salt Lake County Geologist Darlene Batatian.
May 4, 2004	City Council approves preliminary plat for all phases of Stoneleigh Heights (Oak Vista 12).
June 3, 2004	Supplemental information is provided to Draper City addressing comments received from Darlene Batatian's review. This information is provided by David Fadling of PSI.
June 3, 2004	Geotechnical Engineering Study is completed and submitted to Draper City.
June 4, 2004	Staff Report from Margaret Pahl stating developer's consultants have

CHAPMAN AND CUTLER LLP

	responded to the City's consultant's geology and geotechnical review.
June 10, 2004	Planning Commission forwards positive recommendation to City Council for final plat of Phase 1.
June 10, 2004	Request for Council Action prepared by Margaret Pahl for Stoneleigh Heights Phase 1 Final Plat.
June 15, 2004	City Council approves Phase 1 final plat.
January 15, 2005	Planning Commission forwards positive recommendation to City Council for final plat of Phase 2 .
February 15, 2005	City Council approves Phase 2 final plat.
August 3, 2006	Planning Commission forwards positive recommendation to City Council for final plat for Phase 3A.
September 5, 2006	City Council continues final approval of Phase 3A until all information requested of staff is supplied and thoroughly analyzed.
December 20, 2006	Darlene Batatian reviews geology and geotechnical information again and agrees that landslides do not affect the development and that mitigation recommendations are not warranted.
January 2, 2007	City Council continues final approval of Phase 3A until legal staff can review and make a recommendation.
January 23, 2007	City Council again continues final plat approval for Phase 3A of Stoneleigh Subdivision for further information.

**ADVISORY OPINION**

A municipality shall approve an application for subdivision approval when the applicant submits a proposed plat which complies with all of the requirements of the jurisdiction. (Section 10-9a-1a, Utah Code).

In this matter, Hamlet Homes has proceeded with the development of Stoneleigh Subdivision Phase 1-3A. Phases 1 and 2 have been previously approved and constructed with no apparent development difficulties.

Phase 3A was recommended by the Planning Commission for approval in August, 2006 to the City Council.

The matter was on the City Council agenda for approval on September 5, 2006. It was continued to a later date pending receipt of additional information and further staff review.

It was placed back on the City Council agenda on January 2, 2007, presumably because staff had received sufficient information as requested in the September, 2006 City Council meeting. No action was taken at the January 2, 2007 meeting.

Law Offices of  
CHAPMAN AND CUTLER LLP

The plat approval was again placed on the agenda on January 23, 2007. Again it was continued after the passage of the following motion:

Council member Edwards moved to continue the final plat for Stoneleigh Heights Phase 3 Subdivision until such time as the City can proceed with additional review of the documentation and information that is before them by accepted landslide specialist to determine the impact of the addition of fill on top of a relic slide. Because of the questions relating to the landslide and also the addition of a retention basin after the approval of preliminary plat that the Council finds that there is a compelling public interest to approving this application and if approved at this time that the public interest may be jeopardized by the approval of this. Council member Edwards indicated that it is prudent for the City Council to proceed with the information they have to allow recognized landslide specialist to review and come to a conclusion as to whether this slide area can withstand the addition of fill slopes and homes. Council member Colbert seconded the motion.

The motion states that because of concerns regarding a "relic landslide" and a "retention basin", additional staff review is necessary.

It appears to this office that the motion was not based on any "compelling or credible information" in the file or presented to either City staff or the City Council. While not the "traditional or frequently seen public clamor", the decision to continue the approval for additional information is without a factual or legal basis and is contrary to the intent of Sec 10-9a-509(1a).

This office has reviewed all of the file and information provided to the City staff and City Council. There is no information in the file that is contrary to or contradictory to the analysis and solutions put forth by the applicant or its consultants. Findings beginning in the 2004 PSI report dated June 3, 2004 and as recent as December 20, 2006 indicate that no additional "landslide mitigation recommendations" are warranted.

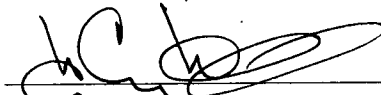

This office has further reviewed Chapter 9-19 Geologic Hazards Ordinance of the City. Based on the reports contained in the file, no disqualifying conditions are present which would preclude the final plat approval of Phase 3A Stoneleigh Heights.

Without further information or contrary professional opinions, the staff recommendations contained in the staff report dated June 4, 2004, attached as EXHIBIT A must be adopted. If during the development or construction phase, seismic or other concerns are discovered, such issues can be addressed, mitigated and/or corrected at that time.

CONCLUSION

It is the opinion of this officer that no information contained in the file justifies the continued denial of Phase 3A Stoneleigh Heights Subdivision.

DATED this 9th day of August, 2007.
